

Select Support Partnerships are experienced support providers working in partnership with a number of local authorities and the NHS.

We can offer support for individuals with learning disabilities (low to high level needs), complex needs, autism spectrum conditions, acquired brain injuries and dual diagnosis.

All our services are planned to deliver support around the identified needs of the person and this process is continual to ensure that our support is adaptable and flexible.

Person centred planning is embedded within our organisation and focuses on working with individuals to determine how best to support them to achieve personal goals.

We involve all of the people who are important to the person we are supporting therefore promoting inclusion, consistency and continuity.
